DATE :

On demand

PRICE :

On demand HT/People

NUMBER OF PARTICIPANTS :

4 To 6 people

REFERENCE :

FO 2527 300 66527 Ind C

The purpose of this training course is to introduce you to AudioLAN by presenting the practical generalities of the product. This module will familiarize you with the operating mode of the Operator's station through full use of its IHM and its equipment.

This training covers different aspects :

- Understanding of the site architecture, its modalities and possible evolutions
- All functions accessible from the operator station
- Installation, use and configuration of the equipment
- *[Installation of AudioLAN « from scratch » as needed]*

A set of product features (activated or not) are discussed in this module, if necessary, by loading the IHM allowing the training of controllers on various operational chains (INEO and competitors). Optimization and factorization data methods are addressed through progressive and pedagogical exercises fitted according to the participants needs.

Training program

DAY 1 : In the morning

AudioLAN – Operator's station Operating Mode "PO or OS"

- Presentation of the environment / platform architecture
- Presentation of all the operator station functionalities:
 - Audio controls
 - The Radio
 - Telephone
 - Recording / playback / statistics
 - Fault Simulation

PARTICIPANTS'PROFILE

- Air Controller
- Operator workstations installation & Maintenance team

PEDAGOGICAL RESSOURCES

- Presentation of the technical expert
- Practical and individual exercises on simulator

END OF TRAINING

- Delivery of a certificate
- Participant and trainer evaluation form

DAY 2 : In the afternoon

AudioLAN - Operator's station Equipment of « PO or OS »

- Identification of hardware components
- Focus on connectivity / connections / scalability
- Explanation of instructor / controller roles
- Configuration of the « Audiobox »
- Identification of the causes of breakdowns
- [as needed : : full commissioning of AudioLAN on a PC]

PRE-REQUISITE

- Air Controller

MONITORING AND EVALUATION

- Individual evaluation performed by the trainer
- Monitoring of each participant through pedagogical and progressive exercises
